Bill with the details you need

Scan products, hold a bill, select a payment method and create a personalised receipt.

Keep pending balances visible

Review customer dues and supplier balances alongside everyday store activity.

See product profit clearly

Review estimated gross profit by product and date, with missing-cost coverage shown.

The companion HTML tour displays existing application screens with sample records. Gross profit excludes rent, wages and other business expenses.

Explore what your team can do.

Open the customer showcase and move through six application screens. Try searches and filters using fictional store records.

01 Dashboard

Sales, payment methods, customer dues and low-stock alerts in one daily view.

Sales overview / Quick actions

02 New Bill

Product and barcode search, quantities, discounts and multiple payment methods.

Hold bills / Receipt details

03 Stock

Stock balances, adjustments with reasons, movement history and opening-stock import.

Stock review / Recorded changes

04 Customer Dues

Find outstanding bills and follow up using customer details and pending amounts.

Search dues / Record collections

05 Purchases

Supplier purchases, amounts paid, purchase returns and supplier statements.

Stock inward / Supplier balances

06 Profit Reports

Estimated gross profit by product and date, with recorded-cost coverage visible.

Product ranking / Date ranges

Local operation. A plan that fits your store.

Choose Basic, Plus, Pro or Plus Pro according to the modules and limits you need. Request a guided setup and a demonstration of your store workflow.

Module availability follows the licensed plan. Installation requires PostgreSQL.
